Department of Electronics, Vidya Bharati Mahavidyalaya, Amravati, Maharashtra, India

Editorial

Welcome to the **first issue of the Pratibha International Interdisciplinary Journal**, proudly launched by Vidya Bharati Mahavidyalaya (VBMV), Amravati. This milestone marks a significant step in our institution's ongoing mission to foster cross-disciplinary scholarship that bridges knowledge domains and advances learning beyond traditional boundaries.

At VBMV, we have long believed in the value of diverse perspectives. Our esteemed faculty, from basic sciences to management sciences, have contributed rigorously across fields, as evidenced by their numerous publications in previous volumes of our interdisciplinary research journals. Their work exemplifies how collaboration across academic disciplines can generate insights that resonate far beyond the confines of a single study.

This inaugural issue brings together a curated selection of articles spanning the sciences, humanities, business, and technology. Each piece reflects our guiding philosophy: real-world problems are complex and multifaceted, often requiring multidisciplinary approaches to understand and resolve them. Whether exploring scientific phenomena, examining societal systems, or proposing innovative management strategies, the contributions here underscore the strength of an integrative academic lens.

Interdisciplinary work is more than combining domains. By encouraging dialogue among researchers from varied backgrounds, this journal seeks to foster creative inquiry, challenge disciplinary silos, and inspires holistic thinking. We aim not only to disseminate research but also to ignite new collaborations between scholars, students, and practitioners.

Looking forward, the journal aspires to become a vibrant platform for emerging talent as well as established researchers. We invite contributions that tackle global challenges—from sustainability and healthcare to digital innovation and social justice through interdisciplinary methods. Together, we can build bridges between disciplines and nurture scholarship that is both intellectually rich and socially relevant.

I extend sincere thanks to our authors, reviewers, and the editorial team for their dedication to this vision. As you explore this inaugural issue, I hope you will be inspired by the depth, rigor, and creativity embodied in these pages.

Let this be the beginning of an ongoing, dynamic dialogue across fields, institutions, and borders, which will shape the future of multidisciplinary scholarship.

Dr. P. S. Yenkar

Publisher, Pratibha International Interdisciplinary Journal

Index

Sr. No.	Details of research article	Page number
1	Review of Oncology and Infectious Disease Drugs Approved by the FDA in 2024 Oncology Drug Approvals Madhuri Bhade, Mithilesh M. Rathore, Vijay H. Masand	1
